PROFILE

I am a focussed and goal driven individual with a capacity for attuning ones self and supporting others.

WORK EXPERIENCE

Software Development Engineer

09/2018 - present

Telent, Warwick, United Kingdom.

I started at Telent in 2018 as a Graduate engineer, once the programme ended I was promoted to my current role.

- A national scale network transformation including bespoke camera monitoring, maintenance, and control software.
- An internal alarm aggregation tool to corroborate information between multiple asset monitoring systems.
- A camera maintenance and monitoring system including alignment tooling.
- A Site level asset monitoring application with multiple assets and sensor types.
- Scripts and configurations to monitor System X for BT.
